

Brian E. Jurczyk

Information Security Leader | Cybersecurity Executive

brianjurczyk@gmail.com • (203) 887-6852 • itsjurz.com • linkedin.com/in/brianjurczyk • Milford, CT

EXECUTIVE SUMMARY

I build and lead enterprise security programs that protect what matters most — people, intellectual property, and data — and earn the trust that lets the business operate. Two decades translating threat landscapes into risk-based strategy that earns board confidence and lets the business move faster, not slower.

Clean audits across regulated frameworks (GxP, FDA/EMA, SOX, SOC 1 Type 2, SOC 2). Cloud-first transformations. Vulnerability reductions north of 65%. Seven-figure vendor optimization. Programs built to hold under scrutiny — run the same way whether anyone's watching.

CORE COMPETENCIES

- Cybersecurity Strategy & Roadmaps
- Risk Management & Regulatory Compliance (NIST, ISO, SOC 2, SOX, GxP)
- Cloud & Infrastructure Security (AWS, Azure)
- Board & Executive Reporting
- Data Governance & IP Protection
- Incident Response & Crisis Management
- Business Continuity & Disaster Recovery
- Security Operations & Threat Intelligence
- Vendor Management & Contract Negotiation
- Team Leadership & Talent Development

Certifications: CISSP — Certified Information Systems Security Professional, ISC2

PROFESSIONAL EXPERIENCE

Arvinas, Inc. — New Haven, CT | *Clinical-stage biopharmaceutical • ~500+ employees, US + international*

Senior Manager, IT Security (de facto Information Security lead)

2022 – Present

Senior-most security leader, owning enterprise security strategy and operations end-to-end on a multi-million-dollar program. Solo internal security executive orchestrating MSSP partners, identity, cloud, vulnerability management, and audit response across 500+ endpoints. Report to the SVP of IT; brief the CFO and executive team on security risk quarterly, with ad hoc briefings to the board on material matters.

- Reduced **critical and high-severity vulnerabilities by 65%** by rebuilding the security operations framework — integrating MSSP-led SOC, vulnerability management, and advanced endpoint protection into a single coherent program.
- Directed enterprise **penetration testing cycles**, driving remediation to closure across application, infrastructure, and identity layers.

- Passed **GxP regulatory inspections (FDA/EMA), SOX IT controls, and customer/partner security due diligence** reviews — sustaining commercial and research operations under regulator scrutiny.
- Eliminated **\$500K–\$1M in annual security spend** through vendor consolidation and contract renegotiation, while expanding coverage.
- Authored and operationalized enterprise **BYOD, Incident Response, and Disaster Recovery programs** aligned to regulatory and industry standards.
- Hardened **cloud and identity security** across Azure, Active Directory, and SAML/Okta — establishing identity as the perimeter.

LogicSource, Inc. — Norwalk, CT | *Global procurement services • ~200+ employees, US + international*

Manager, Corporate IT & Security

2014 – 2022

Promoted to lead IT and Security operations for a globally distributed procurement services firm. Designed and executed enterprise security frameworks that delivered regulatory compliance while modernizing the underlying infrastructure for scale.

- Achieved **SOC 1 Type 2 certification with zero exceptions for multiple consecutive years**; drove SOC 2 readiness across the organization.
- Executed **100% migration to AWS and Office 365**, establishing the firm's cloud-first architecture and security baseline.
- Stood up a **disaster recovery site** ensuring operational continuity across US and international geographies.
- Authored enterprise **BYOD, Disaster Recovery, and Information Security policies** adopted across distributed teams.
- Drove data security innovation, including a **custom data warehouse and reporting platform** serving analytics across **70+ enterprise client accounts**.
- Led major IT infrastructure projects, including new office buildouts and enterprise system migrations.

Senior Business Intelligence Developer • LogicSource, Inc., Norwalk, CT

2012 – 2014

Designed and deployed enterprise data solutions supporting procurement and financial analytics. Built and maintained secure, scalable data warehouses — the data-engineering foundation that later shaped my approach to security: starting from how data actually flows.

EARLIER CAREER

Audit and IT QA roles at **BPA Worldwide** and **Tauck World Discovery** — foundation in compliance, controls, and operational quality.

EDUCATION

- **M.S. Computer Information Systems (Security Concentration)** — Boston University, Boston, MA
- **B.A.** — Central Connecticut State University, New Britain, CT
